

Download Attention Deficit Disorder And Hyperactivity

Attention deficit hyperactivity disorder (ADHD) is a mental disorder of the neurodevelopmental type. It is characterized by difficulty paying attention, excessive activity, and behavior without regards to consequences which is not appropriate for a person's age. Attention Deficit Hyperactivity Disorder among Children Aged 5-17 Years in the United States, 1998-2009 (National Center for Health Statistics) Attention deficit hyperactivity disorder (ADHD) is a behavioural disorder that includes symptoms such as inattentiveness, hyperactivity and impulsiveness. Symptoms of ADHD tend to be noticed at an early age and may become more noticeable when a child's circumstances change, such as when they start school. Attention deficit hyperactivity disorder predominantly inattentive (ADHD-PI or ADHD-I), is one of the three presentations of attention deficit hyperactivity disorder (ADHD). Before 1994, it was classified as attention deficit disorder (ADD) in the Diagnostic and Statistical Manual (DSM).
