Effects of dissociation of methane hydrates on the mechanical properties of sea-floor sediment. Methane hydrate dissociation has been associated with tsunami-triggered sea-floor slope instability. Engineering is the application of knowledge in the form of science, mathematics, and empirical evidence, to the innovation, design, construction, operation and maintenance of structures, machines, materials, devices, systems, processes, and organizations. Geotechnical Engineering Journal of SEAGS: 2011-2015: From Editor in Chief: A. S. Balasubramaniam (Bala) Editor – in - Chief of SEAGS-AGSSEA Journal B Sc, PhD (Cambridge) Formerly, Post-Doctorate Research Fellow, Royal Norwegian Council for Engineering is the discipline and profession that applies scientific theories, mathematical methods, and empirical evidence to design, create, and analyze technological solutions cognizant of safety, human factors, physical laws, regulations, practicality, and cost.
