

Download Commercial Aviation Safety

Commercial aviation is the part of civil aviation (both general aviation and scheduled airline services) that involves operating aircraft for hire to transport passengers or multiple loads of cargo. Aviation safety means the state of an aviation system or organization in which risks associated with aviation activities, related to, or in direct support of the operation of aircraft, are reduced and controlled to an acceptable level. Aviation Safety Network - The resource centre for aircraft accidents and civil aviation safety issues. Safety is the primary consideration when Boeing engineers design an airplane. All Boeing airplanes undergo rigorous testing and continuous monitoring worldwide.
