Biology news and videos from research institutes around the world. Updated daily. On the cover: Life is an inherently social experience—organisms from across the tree of life engage in interactions with their own kind and others, some beneficial and cooperative, others fraught with conflict. When does life begin? When does life begin? To top Current Issues in Molecular Biology (CIMB) is a peer-reviewed journal publishing review articles and minireviews in all areas of molecular biology and molecular microbiology. Manuscripts undergo a peer-review process. Many articles are open access immediately upon publication. Submitted articles are subject to an Article Processing Charge (APC).
