

Download In The Beginning There Was Physics

In this lecture, I would like to discuss whether time itself has a beginning, and whether it will have an end. All the evidence seems to indicate, that the universe has not existed forever, but that it had a beginning, about 15 billion years ago. We would like to show you a description here but the site won't allow us. In the beginning there was continuous flow, and then Max Planck came along and proposed quantization. Quantization basically just means, that instead of being continuous, things such as EM radiation, can only exist in multiples of certain values. [Physics FAQ] - Original by Chris Hillman (with contributions by Nathan Urban) September 1998. Are There Any Good Books on Relativity Theory? You bet!
