"The Man Who Tasted Shapes" by Richard E. Cytowic is a very informative introduction to the topic of synesthesia and for readers who are interested in learning about the relationship between neurology and neuropsychology. It is a great book for readers, who want to obtain a better understanding of the field of clinical neuropsychology, as well as those who would like to see some human experiences of synesthesia as a reference. This point of this review is to help inform readers about the ...'The Man Who Tasted Shapes' is a good title - because if I had seen this book on a shelf with the title 'Synaesthesia: An Introduction,' or 'Understanding Synaesthesia,' I would probably have lightly fingered the book and then my dainty little fingers would've found something else to finger.
