

# Download Mexico And Mexico City In The World Economy

Mexico City's leading position with regard to other urban centres of the developing world can be attributed to its origins in a rich and diverse environment, its long history as a densely populated area, and the central role that its rulers have defined for it throughout the ages. Mexico City, or the City of Mexico (Spanish: Ciudad de México, American Spanish: [sjuˈða(ð) ðe ˈmexiko] ; abbreviated as CDMX, Nahuatl languages: ʔltepʔtl Mʔxihco), is the capital of Mexico and the most populous city in North America. Mexico City is one of the most important cultural and financial centres in the Americas. It is located ...A recent report from researchers at the National Autonomous University of Mexico (UNAM) and the Metropolitan Autonomous University (UAM) confirms that the height of the water table below Mexico City is dropping by about one meter a year, as more water is pumped out of the aquifer than the natural replenishment rate from rainfall. The economy of Mexico is the 15th largest in the world in nominal terms and the 11th largest by purchasing power parity, according to the International Monetary Fund. Since the 1994 crisis, administrations have improved the country's macroeconomic fundamentals.
