WBDG is a gateway to up-to-date information on integrated 'whole building' design techniques and technologies. The goal of 'Whole Building' Design is to create a successful high-performance building by applying an integrated design and team approach to the project during the planning and programming phases. Introduction . ADRP 3-37 is a new publication that expands on the protection principles found in ADP 3-37. The doctrine described in this publication is nested within ADRP 3-0 and describes protection as a continuing activity and a Best Practices for Planning and Managing Physical Security Resources . Preface . One of the Department of Homeland Security's (DHS) national priorities is the protection of In this chapter, we report our broad conclusions related to each of the themes we introduced at the start of the report. These conclusions reflect detailed consideration of (1) our research into current views of systems engineering, (2) what the committee learned is needed to meet the requirements
