

# Download Root And Tuber Crops

Due to a legion of computer problems we've not had a chance to update this page in some time. Please email to check stock and current pricing for plants on this page before ordering. Root vegetables are underground plant parts eaten by humans as food. Although botany distinguishes true roots (such as taproots and tuberous roots) from non-roots (such as bulbs, corms, rhizomes, and tubers, although some contain both hypocotyl and taproot tissue), the term "root vegetable" is applied to all these types in agricultural and ... Root-knot nematodes are plant-parasitic nematodes from the genus *Meloidogyne*. They exist in soil in areas with hot climates or short winters. About 2000 plants worldwide are susceptible to infection by root-knot nematodes and they cause approximately 5% of global crop loss. Root-knot nematode larvae infect plant roots, causing the development ... The formulation of the Tree Crops Policy (TCP) in Ghana takes into account the major policy and strategic documents developed and currently being implemented in Ghana.
