

# Download The New Consultation Developing Doctor Patient Communication

1. 'Physical, Psychological and Social' (1972) The RCGP model encourages the doctor to extend his thinking practice beyond the purely organic approach to patients, i.e. to include the patient's emotional, family, social and environmental circumstances. This systematic review, in which 12 original research papers and meta-analyses were included, explored whether patients' socio-economic status influences doctor-patient communication. Six Category Intervention Analysis (1975) In the mid- 1970's the humanist Psychologist John Heron developed a simple but comprehensive model of the array of interventions a doctor (counsellor or therapist) could use with the patient (client). Dr. Michael Nguyen is a world renowned and Harvard trained vein specialist in Manhattan. He leads the team of vein doctors offering the highest level of care at the Spider and Varicose Vein Treatment Center in New York & New Jersey.
